

Joint Action  
Antimicrobial Resistance and  
Healthcare-Associated Infections

Co-funded by the  
Health Programme  
of the European Union

# OneHealth EJP: a European network

Hein Imberechts

*Scientific EJP Coordinator & WP3 Leader*

## EJP as in instrument

- European Joint Programme Co-fund (EJP) under Horizon 2020
- Co-fund (up to 70% in-kind contribution: Public-2-Public)
  - 5 years project
  - Yearly annual work plan, based on a summary progress report
  - EJP beneficiaries are Programme Managers
  - Organisation with mandates from Ministries, i.e. Programme Owners

5 YEAR  
PROGRAMME

HORIZON 2020  
50% CO-FUNDED  
€ 90 MILLION

39 ORGANISATIONS  
IN 19 MEMBER  
STATES

## Key facts about any EJP

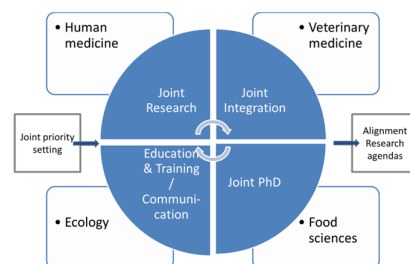

- The aim is to **bring together national public entities with research activities** as part of their mission while research not being necessarily the core function
  - Contribute scientifically to policy implementation
- In contrast to the ERA-NET scheme, main actors are not R&I funding agencies
  - Rather, public entities with **policy-driven R&I**
  - Complement, not duplicate
- Therefore, an EJP has a societal responsibility

This presentation is part of the European Joint Programme One Health EJP. This project has received funding from the European Union's Horizon 2020 research and innovation programme under Grant Agreement No 773830.

## OneHealth EJP main objectives

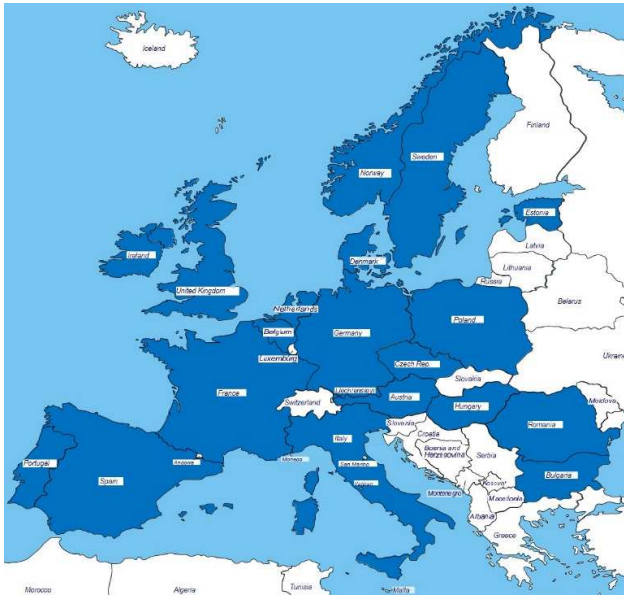

- To develop a **European network** of public mission organisations
- Mainly with reference laboratory functions on infectious diseases
- The EJP integrates medical, veterinary and food scientists in the field of food and feed safety
- To improve **prevention, detection and response** in the fields of **foodborne zoonoses, antimicrobial resistance and emerging infectious threats**
- Through integration and alignment of approaches and methodologies of joint priority and through deciding on a joint research agenda
- The final objective is to **improve the quality and compatibility of information for decision making**, taking into account the **public health concerns** of consumers and other stakeholders throughout the food chain

This presentation is part of the European Joint Programme One Health EJP. This project has received funding from the European Union's Horizon 2020 research and innovation programme under Grant Agreement No 773830.

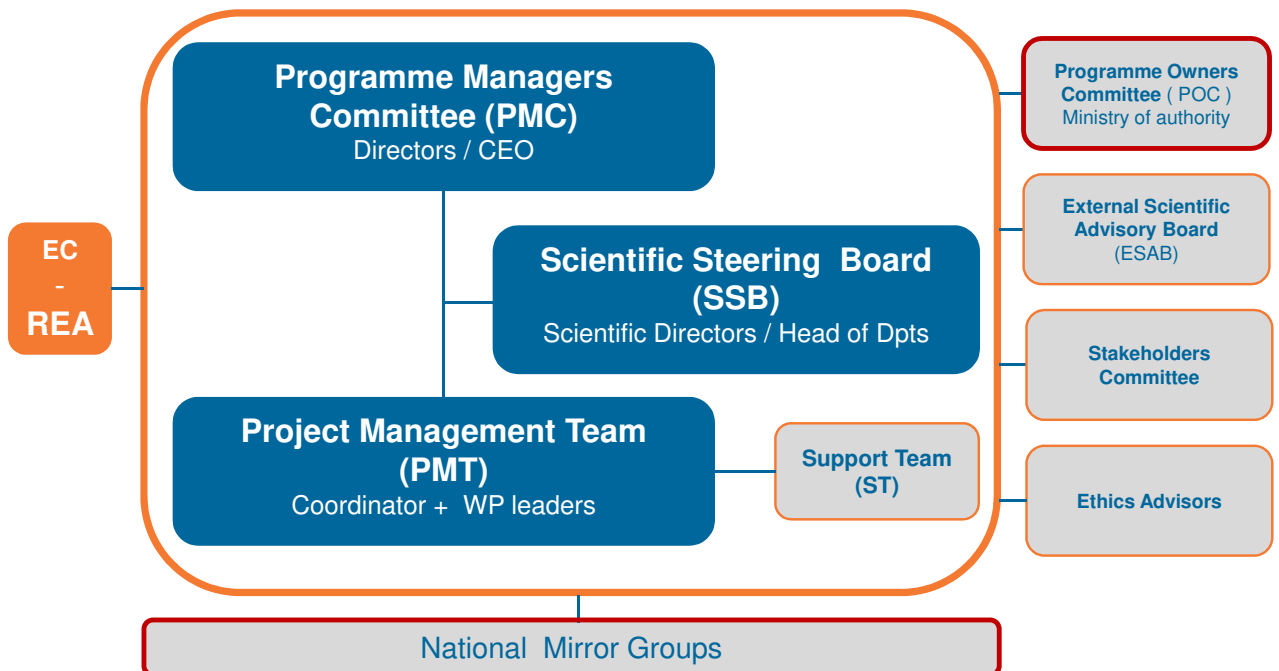

# 39 organisations

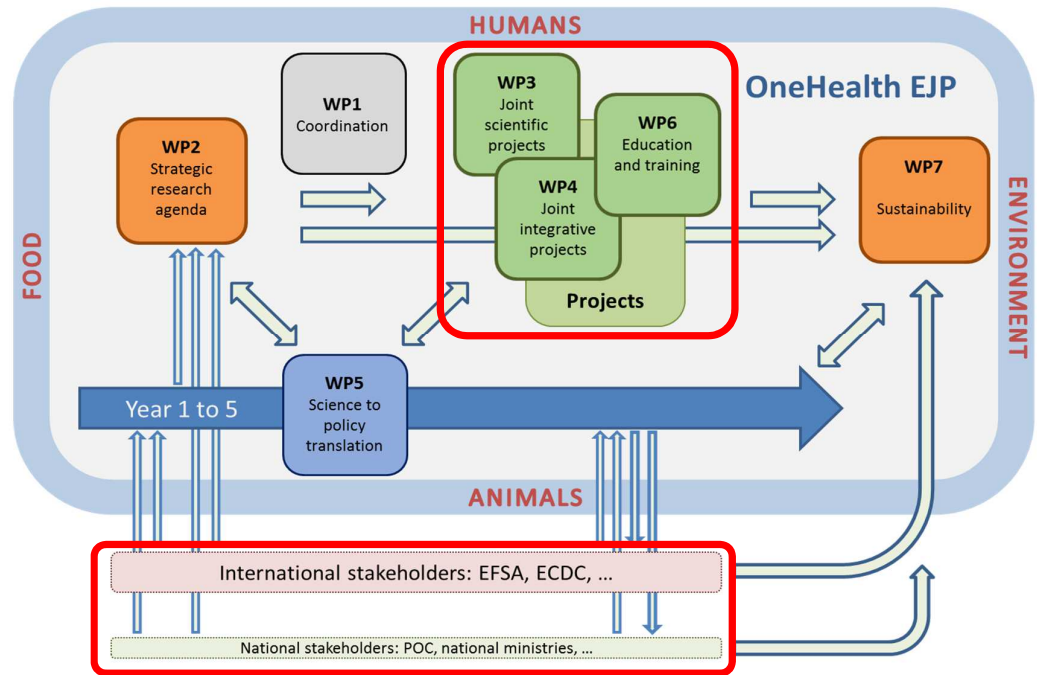

Bringing together the major European organisations in the fields of foodborne zoonoses, antimicrobial resistance and emerging threats dealing with national mandates of reference and performing official programmes in these domains  
**(39 partners, 19 MS)**

This presentation is part of the European Joint Programme One Health EJP. This project has received funding from the European Union's Horizon 2020 research and innovation programme under Grant Agreement No 773830.

# OneHealth EJP Activities

External organizations can join at their own expenses

**Creating a network of research institutes** that focuses on food-borne zoonoses, antimicrobial resistance and emerging zoonotic threats

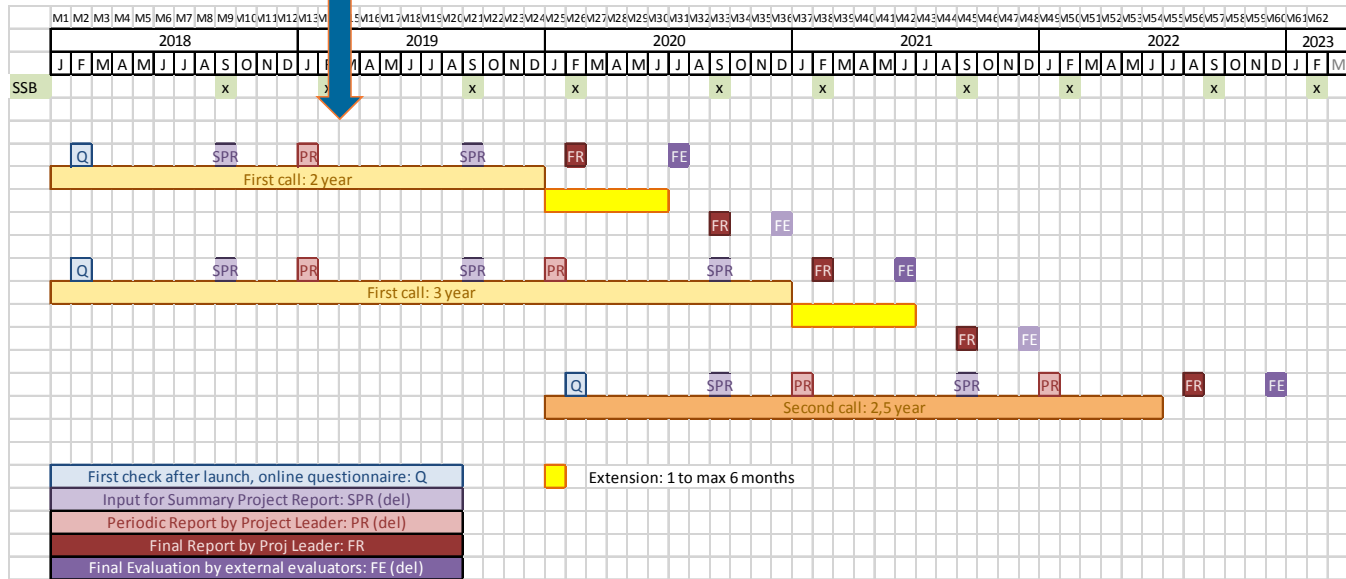

This presentation is part of the European Joint Programme One Health EJP. This project has received funding from the European Union's Horizon 2020 research and innovation programme under Grant Agreement No 773830.

## Two internal calls: Planning of the projects

This presentation is part of the European Joint Programme One Health EJP. This project has received funding from the European Union's Horizon 2020 research and innovation programme under Grant Agreement No 773830.

## Links with other EU Projects

- Exchanges with EU funded projects: JPI AMR, COMPARE, EFFORT, but also JAMRAI, IRC / STAR-IDAZ
- Synergies with these projects
  - Avoid duplication
  - Improve integration
- To participate to the respective stakeholders fora/committees
- To strengthen the sustainability plan

This presentation is part of the European Joint Programme One Health EJP. This project has received funding from the European Union's Horizon 2020 research and innovation programme under Grant Agreement No 773830.
