Jorrit Kabel, National Institute for Public Health and the Environment (RIVM)
Lieke Cuijpers, Ministry of Health, Welfare & Sport of the Netherlands

**Co-funded by
the European Union**

Foreword

Dear Participants,

We are excited to welcome you to the 1st Live Meeting of Work Package 5 (the One Health Policy Group) in vibrant The Hague, Netherlands! This gathering represents a significant step in the EU-JAMRAI 2 collaboration as we work together to tackle antimicrobial resistance (AMR) across Europe through a unified One Health approach.

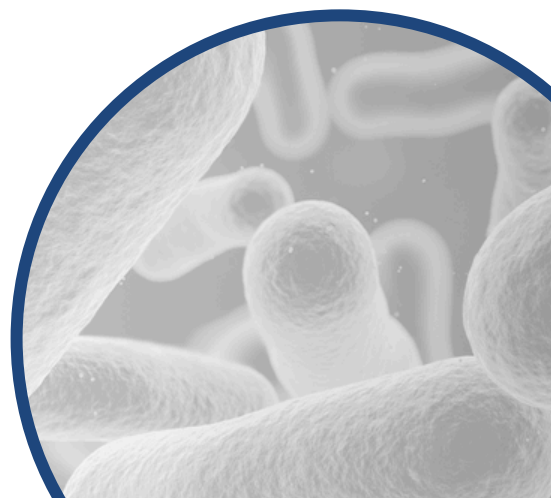

Our primary goal for this meeting is to explore the unique policy needs of each participating country, particularly regarding AMR and healthcare-associated infections (HAIs). WP5 serves as a vital connector, uniting all EU member states and work packages within EU-JAMRAI 2 to establish a comprehensive support network. Together, we can address individual challenges while promoting strategies that benefit the entire EU.

To maximize our time together, we encourage participants to prepare by reviewing the survey results and familiarizing themselves with the specific national challenges they face in establishing and implementing their National Action Plans (NAPs) on AMR. This background knowledge will enrich our discussions and facilitate a more productive exchange of insights and strategies.

Throughout the event, we have an exciting opportunity to share knowledge, tackle common obstacles, and strengthen our expanding EU-wide network. Let's embrace this chance to collaborate, learn from one another's experiences, and make meaningful progress toward a healthier, more resilient future. While the road ahead may be challenging, together we can lay a strong foundation for a One Health approach to AMR across Europe!
